

ESWELL Newsletter

January 2021

Dear ESWELL customer,

I hope you have had a good start into 2021, even though most countries are in a regional or national lockdown again.

As with previous newsletters, I want to give you an overview over all news from ESWELL during the past year, as well as some information about what will come in 2021.

Updated brochures

As announced in the last newsletter, we have just made a small update of our Positioning Pads brochure and removed the Velcro straps and belts as our Declaration of Conformity will not cover these after May 26th 2021.

We have also updated our brochure with mattresses for operating tables from Trumpf. Now all mattresses for the new PST300 and PST500 operating tables are included as well as mattresses for the new universal adapter.

Item no.	Description	Colour	Size L x W x H in mm	List price in EUR	
228905	Mattress for universal adapter	Black	630 x 545 x 100	428,38	
228906	Mattress for universal adapter	Blue	630 x 545 x 100	428,38

ESWELL

Finally, we have decided to remove item no. 249718 and 249725 (mattress for carbon segment) from our standard range and from the brochure. However, it will still be available, but you have to expect some delivery time.

All updated brochures are already available on our website www.eswell.eu for download in all languages. If you need printed copies, just let us know.

Updated pricelist

We have updated all pricelists and these are available as excel or PDF files.

Update: New Medical Device Regulation

The deadline for the new Medical Device Regulation (MDR 2017/745), which will replace the existing Medical Device Directive (MDD 93/42/EEC), has been postponed to May 26th 2021. As mentioned in the previous newsletter, the primary visible change will be the labelling on the product and on the packaging. Within the next months, we will therefore introduce the new labels on all standard products and packaging that will include the LOT no., the UDI (Unique Device Identification) code as well as a GS1 data matrix.

ESWELL

International exhibitions

If you are participating at a congress/exhibition/meeting in your country, where you think that the participation of ESHELL could make a difference, let me know. I can join you at the exhibition and take with me our pressure imaging device in order to show how pressure changes when placing patients in different positions.
